

# Craft smiles with precision and performance

---

CLARITY™ ADVANCED  
CERAMIC BRACKETS

# Performance and appearance that exceed expectations

---

Through the combination of progressive technology and state-of-the-art design, Clarity Advanced Ceramic Brackets deliver brilliant esthetics, small design, predictable debonding and enhanced patient comfort. And, they're available with unique Solventum™ APC™ Flash-Free Adhesive, to make the bonding experience faster and more efficient than ever before.

## Distinct design

Let your patient's smile shine through in every way with Clarity Advanced Ceramic Brackets. These ultra-small translucent brackets are designed to blend with one's natural tooth color, while resisting staining and discoloration throughout treatment.

### Small bracket — strong performance

Showcasing a fine-grained ceramic material and created through an injection-molding process, Clarity Advanced Ceramic Brackets offer trusted strength in a small size and one of the lowest profiles in the industry. Additionally, Clarity Advanced Ceramic Brackets offer ample under tie-wing space, allowing for flexible treatment and ligation options.

Small grain size provides trusted strength in a smaller bracket
